Notes

Turntables must be properly isolated to prevent feedback through needles when playing on full volume. Turntables must be placed on stable, non-vibrating surface (we recommend 2 concrete stones placed on 4 squash balls) on a hip-high table of sturdy quality. The monitors should be able to play at least 110 dbA without noise distortion. Monitoring should consist of subwoofers and tops for each side, no floor monitors. All equipment needs to be sound-checked prior the performance by promoter.
